

Conflict Minerals

Ref: Conflict Metals or Dodd-Frank Wall Street Reform and Consumer Protection Act in 2010: Section 1502 - Conflict Minerals.

Metroseal undertakes due diligence to attempt to determine if use of any of the “conflict minerals” in our products directly or indirectly finance or benefit armed groups. US Federal law defines “conflict minerals” as (i) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (ii) any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in the Democratic Republic of the Congo or an adjoining country (collectively known as the “Covered Countries”).

We have reviewed our existing supply base. We can confirm that at this time there is no indication that any products we supply contain minerals that directly or indirectly finance or benefit armed groups in the Covered Countries.
